

Omega Builds Your Custom Program in a Four Step Process:

1 ASSESSMENT

- The Woodcock Johnson III assessment evaluates your child in all areas of reading and math.
- Specific skill gaps are found in each academic area and a “road map” is created for your tutor.

2 CUSTOM PROGRAM

- A custom program is developed and a specific tutor is chosen for your student.
- At your private conference, our Center Director reviews the results and recommendation.
- Two to four hours a week at Omega are recommended to complete your program. Program length varies upon assessment results.

3 DAILY COMMUNICATION

- At each session the student is graded in the areas of effort, attitude, and accuracy. There are comments and recommendations made for home growth.
- This DAILY correspondence is emailed to the student’s parents and teacher at school to keep everyone informed and create your academic team.

4 OMEGA RESULTS

- After completing your program, a post assessment and final conference is scheduled to review your child’s academic growth!

Programs Offered

- READING ENRICHMENT
- READING REMEDIATION
- STUDY SKILLS
- WRITING SKILLS
- FUNDAMENTAL MATH
- ALGEBRA
- CALCULUS
- STATE TEST PREP
- SAT / ACT / GED PREP
- FOREIGN LANGUAGE
- ENRICHMENT
- HOMEWORK/SCHOOL PROJECTS

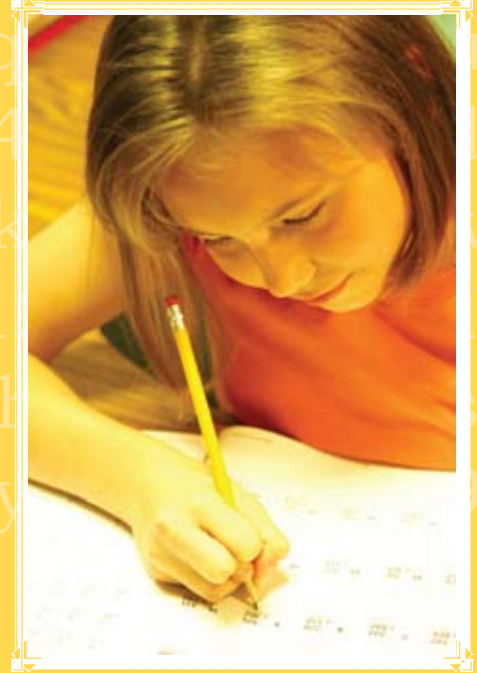

THE LAST WORD IN EDUCATION®

- SAFE, CARING AND POSITIVE LEARNING ENVIRONMENT
- COMMITTED AND CARING CERTIFIED TEACHERS
- **SACS ACCREDITED**
- 3:1 STUDENT-TEACHER RATIO
- ONE-ON-ONE INSTRUCTION
- IMMEDIATE ACCESS TO THE TUTOR
- ABILITY TO WORK INDEPENDENTLY

OMEGA LEARNING CENTER

Achieve Success through Omega Learning®

Private Supplemental Education for Reading Comprehension, Math, Study Skills, Writing, Phonics, SAT Prep

Private Supplemental Education

Omega's mission is to provide higher learning education opportunities for **all ages** throughout their academic years. Classrooms in the public schools are overflowing with students. Children need extra attention to help them grasp the basic building blocks of learning. More and more students are turning to Omega to reach their personal academic goals.

Individualized Instruction

The basic skills a child needs to succeed either in math or reading are like building blocks. **If the building blocks are not firmly in place, they cannot serve as a foundation for more advanced skills.** Most skill gaps go undetected until students are faced with more advanced concepts. For example, if a student has trouble with division, a basic math skill, the student will fail to grasp more complex concepts such as Algebra that requires knowledge of fractions. Once we have an interpretive account of the student's skill levels in relation to grade level and age, we will work with the parents to determine learning objectives. **Omega strives to ensure that our instructors use the most effective learning style for each student.**

Critical Thinking Skills

Our students learn from a combination of our enrichment based curriculum and your school curriculum. **Instead of relying on memorization, Omega encourages our students to develop the critical thinking skills needed to apply their new knowledge to more advanced concepts.** These abstract thinking skills are very important in understanding multi-step math concepts. Similarly, these skills help with comprehension as the students are encouraged to make inferences and look for context clues.

Daily Communication

Our students play an integral role in driving their academic success. We teach students the study skills necessary for independent learning. **All mastered skills are logged regularly and progress is emailed to you and their teacher at school.** By including the student's teacher, we create a powerful academic team with a common goal. Midway through your program you will participate in a private conference where your tutor reviews all completed work, discusses progress and sets future goals. Each student progresses at their own pace and milestones are achieved throughout your program which leads to academic success and increased self confidence.

FUNfunFUNfun

Motivational Approach

Omega certified tutors give motivational praise and positive verbal reinforcements to aid in your child's success. During each session our tutors also award enrichment "tokens."

Students may redeem tokens for a variety of prizes from small toys and games to rewarding gift cards, all available at the "Omega Store."

TOKENS FOR:

- **Correct Answers**
- **Good Effort**
- **Good Behavior**

This motivational approach builds stronger skills, which encourages better study habits, higher self-esteem and happier kids!

Learning Styles

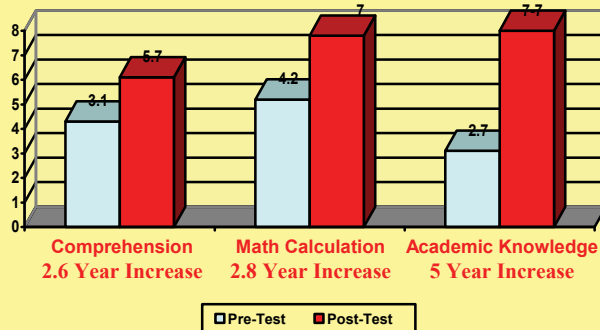

According to many educators and learning theorists there are three main learning styles:

- 1. Auditory** - Your child learns best by listening or hearing. They would rather talk about a situation. The student would benefit mostly from verbal communication or instruction.
- 2. Visual** - Your child learns best by seeing. They would rather watch a demonstration and visualize the information.
- 3. Tactile** - Your child learns best by doing. They would rather have direct involvement in what they learn. Your child would benefit from using manipulatives for problem solving.

Omega Results Guaranteed**

*Omega Learning Center students average a Grade placement growth of 3 years and 4 months after an average of 95 hours of tutoring.**

*Yearly Statistics are based on calculating the average grade equivalent post test academic growth in the areas of Comprehension, Math Calculation, and Academic Knowledge.

**Omega guarantees a one year academic year increase in your program emphasis (Comprehension or Calculation) after completing your recommended program or you will receive fifteen hours of free tutoring!
